About Us

Integrated engineering capability, practical delivery and responsible client service.

Astrovex General Company Limited is a Uganda-based engineering company providing integrated Mechanical, Electrical and Plumbing services, supported by civil engineering and built-environment capabilities.

The company delivers practical solutions for power systems, electrical installations, mechanical equipment, plumbing, renewable energy, security systems and related infrastructure. Its service approach covers site assessment, planning, installation, testing, maintenance and project handover.

Astrovex combines technical capability with responsive project coordination to help clients achieve systems that are safe, reliable and maintainable. Each assignment is planned around the operating needs of the site, the agreed scope, delivery programme and available budget.

Published technical work demonstrates field involvement with substations, switchgear, power-line operations, cable installation and equipment inspection. These capabilities are complemented by air-conditioning, motor rewinding, solar systems, CCTV, access control and motorised gate solutions.

The company is committed to quality, safety, responsible execution and client satisfaction while continuing to strengthen its capability in sustainable energy, building automation and energy-efficiency solutions.

CORPORATE POSITION

A dependable engineering partner for integrated MEP systems and supporting infrastructure.

Vision & Mission

The direction that guides our growth and every client engagement.

Vision

To become a leading MEP services provider in Uganda and the region, recognised for expertise, reliability, quality and dedication to excellence.

Mission

To deliver exceptional mechanical, electrical and plumbing services through practical engineering, skilled people and a consistent focus on safety, quality and client success.

CORE VALUES

- **Integrity:** We communicate honestly, honour commitments and act responsibly.
- **Professionalism:** We approach every assignment with discipline, accountability and respect.
- **Technical Excellence:** We apply sound engineering judgement and practical problem solving.
- **Quality:** We pursue dependable workmanship and systems that meet agreed requirements.
- **Safety:** We protect people, property and operations through responsible working practices.
- **Client Focus:** We listen carefully and tailor solutions to the client's real priorities.

OBJECTIVES

1. Faster Project Delivery

Reduce project delivery time through process improvement, efficient resource allocation and stronger teamwork.

2. Strategic Partnerships

Develop dependable supplier and service-provider relationships that improve availability, efficiency and project support.

3. Expanded Service Capability

Grow sustainable energy, building automation and energy-efficiency solutions around changing client needs.

4. Innovation and Continuous Improvement

Strengthen technical capability through practical training, knowledge sharing and improved work methods.

5. Strong Regional Market Presence

Build recognition as a dependable MEP engineering company defined by expertise, quality, innovation and client service.

Our Services

Integrated building-services and power-engineering capability.

Electrical & Power Engineering

- Electrical installation and wiring
- Power distribution and switchgear systems
- Power-line construction support
- Substation design and construction
- Testing, inspection and maintenance support

Mechanical Engineering Services

- Air-conditioning installation and support
- Motor rewinding and equipment maintenance
- Motorised swing and sliding gate systems
- Planned and corrective maintenance

Plumbing & Water Systems

- Water supply and distribution installations
- Sanitary plumbing and drainage systems
- Maintenance, repair and system improvement
- Coordination with architectural and civil works

Our Services

Energy, security, access-control and project-support solutions.

Renewable Energy & Reliable Power

- Solar systems installation
- Backup and reliable power solutions
- Power-system upgrades and rehabilitation
- Energy-efficiency improvement support

Security & Controlled Access

- CCTV surveillance systems
- Access control system installation
- Motorised gates and controlled entry
- Security-system maintenance support

Project Support & Maintenance

- Site assessment and scope definition
- Installation planning and coordination
- Preventive and corrective maintenance
- Testing, inspection and handover support

Why Choose Astrovex

Technical capability supported by practical delivery and responsible client service.

Astrovex General Company Limited brings together related engineering disciplines, field capability and responsive coordination to support reliable project delivery. The company focuses on practical solutions that match the client's technical needs, operating environment and commercial priorities.

Integrated Engineering Capability

Electrical, mechanical, plumbing, renewable-energy, security and civil-support services are coordinated through one practical delivery approach.

Field-Based Technical Experience

Published project work demonstrates hands-on involvement with substations, switchgear, power-line operations, equipment inspection and cable installation.

Client-Specific Solutions

Each scope is considered around the site, required performance, project interfaces, delivery programme and available budget.

Our commitment: Clear communication, responsible execution and engineering solutions designed for dependable long-term operation.

Why Choose Us

Quality and Safety Focus

Planning, supervision, inspection and responsible working practices are treated as core delivery requirements.

Responsive Local Support

A Uganda-based team provides accessible communication, practical coordination and timely attention to project needs.

Maintainable, Long-Term Value

Solutions are considered around reliability, maintainability, ease of operation and the client's long-term objectives.

Recent / Key Projects

SELECTED TECHNICAL WORK PUBLISHED BY ASTROVEX

Substation Equipment and Infrastructure

Scope: Inspection, installation and technical support around high-voltage substation equipment and associated infrastructure.

Electrical Switchgear and Distribution Panels

Scope: Installation and maintenance support for switchgear, control panels and electrical distribution systems.

Power-Line Field Operations

Scope: Technical field work involving overhead-line equipment, connections, inspection and related electrical infrastructure.

Heavy Cable Installation and Handling

Scope: Cable preparation, controlled handling and installation support for major electrical infrastructure works.

Transformer Equipment Inspection

Scope: Technical inspection, servicing support and operational checks around transformer and associated electrical equipment.

Recent / Key Projects

Reliable Power Systems

Scope: Electrical supply, distribution and technical support for environments where operational continuity is important.

Solar System Installations

Scope: Solar-energy installation capability supporting lower operating costs and improved power resilience.

CCTV and Access Control

Scope: Security-system installation including cameras, controlled entry and related support.

Motorised Gate Systems

Scope: Installation and maintenance of swing and sliding automatic gate systems for controlled access.

Air-Conditioning and Mechanical Support

Scope: Air-conditioning installation, motor rewinding and planned or corrective equipment maintenance.

Plumbing and Water Systems

Scope: Water supply, sanitary plumbing, drainage, maintenance and building-services coordination.

Recent & Key Projects

A selection of engineering systems and field operations published across Astrovex project environments.

01 Switchgear Systems
Distribution and control panels

02 Equipment Inspection
Technical servicing support

03 Power-Line Operations
Field execution and inspection

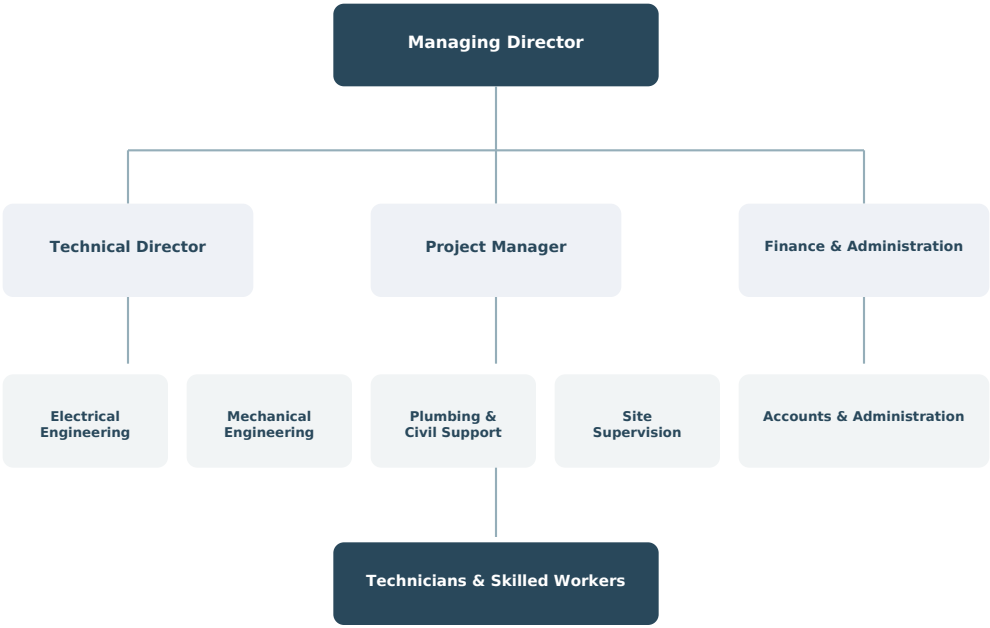

04 Switching Equipment
Substation infrastructure

05 Cable Installation
Heavy cable handling and field works

Organisational Structure

Reporting, responsibility and project delivery leadership.

Our Team

Astrovex brings together technical professionals, site supervisors, technicians and skilled workers to support planning, installation, inspection, maintenance and project handover. Project responsibilities are coordinated around the scope, site conditions and contractual requirements.

01 Engineering
Electrical, mechanical and plumbing capability

02 Project Delivery
Planning, coordination, supervision and reporting

03 Field Operations
Technicians and skilled execution teams

04 Administration
Commercial, finance and documentation support
